WAY OF APPROACH

Data pre-processing
Outliers check, Missing
values check, Filtering
matches on Jan 22nd, 2022

Creation of new variable

Points- using variables FTMade,
2PMade, 3PMade

WonCode- Find the winning team
by through points
(TipOff time was trimmed and
points of teams were compared)
(0- Lost, 1- Won)

Step 1

Step 2

Dataset was altered
and converted to csv
to facilitate pandas
on Python

Step 3

Step 4

A Linear neural network
was created.
Input: FTMade, 2PMade,
3PMade, Points, HasHCA
Target: WonCode
